

VOCABULARY STUDY MENU

Use the ideas below to **ACTIVELY** study your vocabulary words before the retake. You must show that you've studied in at least **3 different ways** before you're ready for the retake.

1. Write each word and its definition. Make sure each definition is in your own words.	2. Explain each word's meaning to someone else. Make sure they understand.	3. Draw a picture for each word. See if you can combine more than one into a picture. Use color!
4. Play a word game (like Words with Friends) and use at least 10 of your words.	5. Have someone say each definition, and you come up with the correct word.	6. Make notecards using paper notecards or an app like Flashcards.
7. Give yourself a pretend quiz. Write down all the words. Then put your list away and correctly write each definition.	8. Draw a concept map (look it up on your iPad!) and connect all of your vocabulary words.	9. Find a picture or clip art for each word. Write down how the word connects to the picture.
